Office Action Summary

Art Unit 1771

1. Restriction is required under 35 U.S.C. § 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

2. Group I, claim(s) 1-6, 11 and 12, drawn to apparatus for depositing a coating on a foil and an accompanying use of the apparatus.

Group II, claim(s) 7, drawn to a method for depositing a partial surface coating onto an air permeable, water-impermeable foil.

Group III, claim(s) 8-10, drawn to an air permeable water impermeable foil having a partial adhesive surface coating thereon.

3. The inventions listed as Groups I, II, and III do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: More particularly, Group I fails to contain any recitation of depositing a partial adhesive surface coating on both sides of the foil, required by the claims of both II directed to a method and III directed to an article. With respect to Groups II and III, the recitation in

Art Unit 1771

the last three lines of claim 7 (Group II directed to a method) reciting a coating which comprises both uncoated areas and areas coated on both sides is believed to not make a contribution over the prior art, and therefore unity of invention is lacking and restriction is appropriate.

4. A telephone call was made to Charles Fallow on October 30, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel Zirker whose telephone number is (703) 308-0031.
